- github.com/reachsaghanamuthu

LANGUAGES

English — Proficient
Tamil — Native

SKILLS

Programming: Java, Python
AI Tools: n8n, GitHub, Vercel, Google AI Studio, Antigravity, Claude, Docker, NotebookLM, etc.

CERTIFICATIONS

- IBM Certification in Enterprise Design Thinking**
IBM, Online
- IBM Certification in Artificial Intelligence Fundamentals**
IBM, Online
- AWS Generative AI Foundations**
AWS, Online
- AI Accelerator Program on Pinnacle Plus Program**
Analytics Vidhya
- Gen AI Professional**
Western State University, California

EDUCATION

SNS College of Technology
2025 – 2029
Bachelor of Technology in Artificial Intelligence and Data Science

INTERESTS

Generative & Agentic AI
Web Development
Problem Solving
Automation
Open-Source Contributions
Hobbies: Singing, Violin

PROFILE

First-year B.Tech student in Artificial Intelligence and Data Science with a strong passion for AI-driven innovation, software development, and problem-solving. Experienced in AI content writing through an internship at InAmigos AI and actively developing real-world projects such as InvestWise AI, a fintech-based application. Skilled in web development, AI tools, and programming, with a keen interest in building intelligent and scalable solutions. Eager to explore opportunities in Artificial Intelligence and Data Science roles while continuously learning emerging technologies and industry trends.

EXPERIENCE

- Web Developer Intern — Codingmart Technologies** Jun 2026 – Jul 2026
 - Built TaskFlow, a full-stack Todo Management Application with Spring Boot, implementing full CRUD REST APIs, JWT-based authentication, and ownership-verified, user-specific data access via Spring Security and Spring Data JPA/Hibernate.
 - Added soft delete & restore, file attachment support, and bulk CSV/Excel import, plus a Kanban-style frontend for task organization.
 - Used PostgreSQL for production data (H2 for dev/testing), documented APIs with Swagger, tested endpoints in Postman, and managed version control through Git/GitHub.
- AI Content Writer Intern — InAmigos Foundation** Apr 2026 – May 2026
Coimbatore, Tamil Nadu
 - Contributed to AI-driven content creation, research, and digital media development.
 - Assisted in creating engaging content, optimizing AI-generated outputs, and supporting innovative AI-based communication strategies.

PROJECTS

- TaskFlow — Todo Management Application**
 - Built a full-stack Spring Boot application with full CRUD REST APIs, JWT-based authentication, and ownership-verified, user-specific data access via Spring Security and Spring Data JPA/Hibernate.
 - Added soft delete & restore, file attachment support, bulk CSV/Excel import, and a Kanban-style frontend for task organization.
 - Used PostgreSQL for production data (H2 for dev/testing), documented APIs with Swagger, and tested endpoints in Postman.
- InvestWise AI — FinTech Project**
 - Developed an AI-powered fintech application focused on smart financial insights and investment guidance.
 - Designed an interactive and user-friendly web interface with AI-based features for financial analysis and decision support.
- HealX AI — Healthcare Assistant**
 - Developed an AI-powered healthcare assistance platform focused on providing smart health support and symptom-based guidance.
 - Designed a responsive and user-friendly interface with AI-driven features to enhance accessibility and healthcare awareness.
- Lumina — RAG-Based Research Paper Answer Bot (Capstone)**
 - Built a Retrieval-Augmented Generation system for intelligent Q&A over research papers using Python, LangChain, ChromaDB, LLaMA 3.2, and BAAI/bge-small embeddings, with MMR for diverse contextual retrieval.
 - Implemented conversational memory with token streaming and a Chainlit UI, over a corpus of 5 curated arXiv papers (Attention, BERT, GPT-3, LLaMA, RAG).
